Snow White will flee from the palace and her wicked stepmother, crossing an inhospitable forest where she will be protected by the wild animals, invited to stay with some dwarfs and given a poisoned apple by a witch, plunging her into a mortal sleep. Princes will come from all over the world to wake her up with a kiss, but none will succeed because in real life Prince Charming who saves sleeping women does not exist.

Snow White's journey to maturity: the transition from naivety to experience.
