Dorothy, a young girl who lives with her aunt and uncle in Kansas, is caught in a tornado that carries her to a strange land governed by the Wizard of Oz. In order to return home, Dorothy has to visit him. She goes, accompanied by a robot, a scarecrow and a lion. They have important wishes they hope will be granted by the Wizard, but for these to come true they must first kill the Wicked Witch of the West. Fantastique Company merges theatre and new technologies, using them in a creative manner, with leading techniques such as video mapping, facial recognition to animate characters, cameras that analyse movement and projectors to make their stage sets interactive.
