2013 FETEN AWARD FOR BEST SHOW FOR EARLY CHILDHOOD

In *Kubik* two actors manipulate a large game of construction blocks that are placed one on top of the other and are transformed, move and generate new spaces to explore, and small movable screens on which images appear. Together the actors discover the pleasure of creating and looking (houses, trains, a forest, the sea...) and submerge the young spectators in their sensorial universe, where they can imagine, discover and dream. In *Kubik* everything changes; one world gives way to the next. The company Teatro Paraíso was founded in Vitoria 40 years ago. It defines itself as a consolidated cultural structure that carries out a global project of intervention in the field of theatre, childhood and artistic education, permanent ly involved in creation and training audiences.
